Bruce A. Van Note
COMMISSIONER

August 8, 2019
Subject: Interstate Hydro Seeding
State WIN: PH018501.19
Location: **Region 2**
Amendment No. 1

Dear Sir/Ms.:

The following questions have been received:

Question: Is there an estimate of the number of acres that will be hydroseeded?

Response: Please review the Schedule of Items page 19 of the bid book. Estimated Quantity is 3,484.8 Units. A Unit is 1,000 Square Feet. This is 3,484,800 Square Feet divided by 43,560 Square Feet per acre and equals 80 Acres.

Question: On page 45 it states that the requirement is to seed 3-4 acres at a time. Is it acceptable to have a water tank there to refill the hydroseeder onsite with? The hydroseeder is capable of completing an acre at a time and then we would refill it from the water tank.

Response: No, the Contractor must be capable of hydroseeding 3 to 4 Acres at a time. The intent is to minimize the amount of time and exposure to our crews, the Contractor crew, and the travelling public.

Consider these changes and information prior to submitting your bid on **August 14, 2019**.

Sincerely,

George M. A. Macdougall P.E.
Contracts & Specifications Engineer
